Our solar-powered refrigerated containers are carefully packaged and shipped to ensure safe delivery. Available in 20ft and 40ft sizes, these units are designed for efficient cold storage and easy ...

Solar shipping container powers irrigation and tools in off-grid farms. Ideal for remote agriculture needing clean, mobile energy.

The Grow Solar Container Farm has growing applications for operations of all sizes, from small or startup businesses that are scaled for cost-effective startup and production.

Researchers have transformed a humble shipping container into a portable, solar-powered irrigation control station, offering a sustainable and mobile alternative to traditional irrigation ...

Our hydroponic circulating system of water delivers essential nutrition to plants and reduces water consumption by up to 90% over traditional soil farming. The output will provide you with fresh and ...

This study explores the design and adaptation of a shipping container into a portable irrigation control station for agricultural operations. The project leverages the structural durability and ...

One of the most promising advancements in agricultural technology is the solar-powered irrigation system. This innovative system harnesses the power of the sun to pump water for irrigation, ...

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

A hydroponic container farm is a modified shipping container designed to grow crops using a soil-free method called hydroponics. Plants are cultivated in water enriched with nutrients, while grow lights ...
