-----

The cement sector accounts for 8% of global CO2 emissions - that's more than all trucks worldwide combined. With net-zero deadlines looming, solar power generation installed on cement facilities has ...

This marks a significant milestone in the companies' journey toward the world's first fully solar-powered cement plant. An early 2022 energy lab demonstration in Spain saw researchers ...

In the CemSol research project, a team of scientists is developing and demonstrating a solar-heated calcination plant to produce cement. This process produces carbon dioxide, which is ...

Synhelion and Cemex collaborate to pioneer solar-powered cement production. Synhelion's technology, originating from ETH Zurich, uses solar radiation to produce syngas for cement production. ...

Cemex and Synhelion announced today a significant milestone in their joint effort to develop fully solar-driven cement production: the scaling of their technology to industrially-viable levels.

Containerized BESS with 1MW PCS and 2MWh battery storage designed for utility scale solar and Solar Power Plant applications. Ideal for peak shaving, energy shifting, and grid stability. Pre-integrated ...

A 1 MW solar plant produces 1,500-2,500 MWh of clean energy annually. This powers hundreds of homes and provides an excellent return on investment when built with modern, high ...

CEMEX and Synhelion have announced a significant milestone to develop fully solar-driven cement production by scaling their technology to industrially-viable levels. This includes the ...

Now, having successfully demonstrated the viability of the technology under continuous and plant-like conditions, Cemex and Synhelion are poised to move forward with the development of ...
