What types of circuit breakers are used in Australia?

C curve breakers are the most common type used in Australian installations. D-Curve Circuit Breakers: D-curve breakers are designed to handle high inrush currents and trip when the current reaches 10-20 times the rated current. They are often used for highly inductive loads, such as transformers or motors with significant startup current.

What are the different types of circuit breakers?

Single-phase, double-phase, and three-phase circuit breakers play vital roles in protecting electrical circuits. Single pole circuit breakers, commonly known as 1 pole breakers, are often used in residential, commercial and industrial applications.

Are circuit breakers safe in Australia?

Yes, all our circuit breakers comply with Australian standards, including AS/NZS 3000:2018, ensuring they meet the necessary safety and performance requirements for electrical installations in Australia. Can I use these circuit breakers in a caravan or RV? Absolutely.
