What is a power hub?

Power Hub is the heart of the off-grid solar system, combining five essential components, including inverter and MPPT charge controllers, in one condensed, exceptionally powerful device. With space for every peripheral accessory, from batteries to solar panels, powering your home is easier than ever.

What is an 80 watt solar module?

An 80 watt solar module is a high efficiency monocrystalline solar module, as in the GP-PV-80M Solar Module from Go Power!, which provides outstanding performance and cost-effective solar power for residential, commercial and industrial applications.

What is a GP-pv-80M solar module?

The GP-PV-80M Solar Module from Go Power! is a high efficiency monocrystalline solar module that provides outstanding performance and cost-effective solar power for residential, commercial, and industrial applications. It features a 25-year limited power output warranty and is built to last.
