Irish Times highlights Trinity Engineering research advancing EV battery life and performance.

After dropping everyone safely back to Dublin, I made one last stop at Ionity in Gorey services Circle K to make sure I could get back to Dublin next day to hand back the car.

According to a Real-world study the data suggests that most modern EVs experience an average annual battery capacity loss of around 1-2%. This means that after several years of use, an ...

Battery degradation is a complex issue affected by multiple factors such as chemical composition, calendar ageing, usage and the number of charge-discharge cycles.

From calling a few our trusted DoneDeal EV dealers, we have heard positive reports of vehicles coming back in with 100,000 kilometres still showing 90% of battery life remaining. This is all just about ...

ESB, the state-owned electricity company, has announced the opening of a major battery plant at its site in Poolbeg, Dublin. The battery plant will add around 75MW of fast-acting energy...

It is located at Poolbeg Energy Hub, where ESB - around 95% owned by the Irish state with the remaining stake held by its employees - is planning to deploy a combination of clean energy ...

Would that unlock even better performance? That's the thinking of Drive, a battery tech start-up established by Dr Séamus O'Shaughnessy and Dr Daniel Trimble, both of Trinity College ...

Maximize battery lifespan and uptime with our on-site maintenance and cleaning services. Our experts ensure optimal performance, prevent issues, and keep your operations efficient.

ESB has today opened a major battery plant at its Poolbeg site in Dublin which will add 75MW of fast-acting energy storage to help provide grid stability and deliver more renewables on...
