How much solar power does Brunei have?

According to data from the International Renewable Energy Agency (IRENA), Brunei's total installed solar capacity stood at 5MW as of the end of 2024--unchanged since 2021. The country aims to generate 30% of its electricity from renewable sources by 2035.

Will Brunei be the largest solar power plant in the world?

The joint venture has secured a land lease agreement with the Brunei government for the project. Once operational, the facility will become the largest solar power installation in Brunei and the first to be developed under a public-private partnership model.

When will a solar farm be built in Brunei?

Construction is expected to be completed by the end of next year. The solar farm will be located in Kampong Belimbing, in Brunei-Muara District, on a 33.3-hectare site that was formerly a landfill and has since been rehabilitated. The joint venture has secured a land lease agreement with the Brunei government for the project.
