Recommendation - On-Deck Stowage Only: It is recommended that all containers with lithium-ion batteries, especially UN 3480 and UN 3536, be stowed on deck only.

From 1 January 2026, lithium-ion batteries that are packed with equipment and vehicles powered by lithium ion or sodium ion batteries must be offered for air transport with the battery at a reduced state ...

Learn why certified containers are crucial for shipping lithium and lithium-ion batteries safely, meeting safety standards, and avoiding potential hazards.

Each distinct shipping guide in this document refers to the regulatory requirements for a specific lithium cell/battery type, configuration, and size. In this way, a shipper will easily find the applicable ...

As a standard guideline, metallic inner packaging for lithium ion batteries is prohibited. Each battery or cell must be entirely enclosed to prevent contact with other equipment or any conductive materials.

These lithium batteries may be poorly designed, have little protection, and/or contain manufacturing flaws. It is important to verify the batteries planned for shipment have been safety-tested. A lithium ...

The use of lithium batteries as a power source for a variety of products has dramatically increased. As a result, so too has their containerized shipments, both as entire cell or battery consignments and as ...

Transport of lithium batteries in containers is a key component of modern logistics, yet it presents extraordinary risks and requires comprehensive knowledge of regulations, safety measures, and ...

Lithium batteries present serious safety risks if not handled properly. If batteries are packed or declared incorrectly, it can lead to issues such as leaks or overheating, which may affect ...

Can container-type lithium batteries be used directly

If the Watt-hour rating isn't clearly marked on your battery case, and the information isn't included on a battery specification or Safety Data Sheet, you can simply determine the battery's Wh-rating by ...
