Alliant Energy has filed an application with the Public Service Commission of Wisconsin seeking approval for a 277-megawatt wind farm in Columbia County, marking one of the utility's most ...

Alliant Energy is taking an important step towards renewable energy with a proposed wind turbine project in Columbia County, Wisconsin. This initiative aims to generate electricity ...

When wind or solar power is abundant, the energy can be used to compress carbon dioxide gas into a liquid. When extra energy is needed, the liquid will be allowed to decompress, ...

Hundreds of wind turbines, linked by power lines and connected in groups to the region's high-voltage transmission system, have been erected on windy ridge tops in eastern Oregon and Washington, ...

Wind energy has long been a cornerstone of the renewable energy sector, yet it faces increasing competition from solar power, supply chain disruptions, and shifting global policies. Here ...

The Columbia Energy Storage Project will take energy from the grid and store it by converting CO₂ gas into a compressed liquid form. When energy is needed, the system converts the liquid CO₂ back to ...

Wind energy has long been a cornerstone of the renewable energy sector, yet it faces increasing competition from solar power, supply chain disruptions, and shifting global policies. Here are three ...

Columbia Power & Water Systems is a public utility proudly serving the citizens of Columbia and Maury County since 1939. CPWS offers power, water, and broadband services.

Alliant Energy hopes to build a new roughly \$730 million wind farm in Columbia County that will provide enough electricity to power about 100,000 homes annually.

Columbia Wind Power Generation System

The Columbia Wind project extends our historic presence in Columbia County and unites a coalition of partnering landowners committed to building a strong, resilient energy future. This project will create ...
