A high-performance, all-in-one, containerized battery energy storage system developed by ballastIQ. Provides C& I clients with an intelligent and reliable solution to optimize energy efficiency and resilience.

As all components used in Eos zinc-powered batteries are fully recyclable in standard facilities, the residual value of our Cube systems can reach up to 30% of the original cost of materials, making end ...

Our C& I Battery Energy Storage System (BESS) is a high-capacity industrial battery storage solution, grid-connected to optimize energy usage and reduce costs.

Containerized BESS can easily be scaled up or down based on demand, making them suitable for both small-scale and large-scale applications, from powering a residential home, to ...

At its core, Containerized Battery Storage is a convergence of advanced battery technology and modular design. It houses batteries--often lithium-ion or other advanced chemistries--within a secure, robust ...

The company introduced a 690Ah high-capacity battery, compatible with capacities from 650Ah to 750Ah, offering a life expectancy of 20 years. The 20-foot storage system using this battery ...

Compact and powerful, the Charge Qube stores up to 450kWh in a durable, 10-foot container. Download the full Charge Qube variant specification sheet. Custom variants available, please enquire for more ...

Standard outdoor battery cabinet, MC Cube-T uses the new-generation LFP battery for energy storage, and adopts the world's first CTS (Cell To System) integration technology, small changes, large capacity.

Whether used as a standalone C& I storage unit or scaled into multi-MWh containerized BESS systems, this high-performance battery guarantees efficiency, reliability, and sustainability for modern energy ...

Lasting at least 25 years and retaining ~97% of the rated capacity, today's Cubes will still be powering away

Containerized cube battery life

well into the 2040s, no matter what temperature abuse or operational shifts you put them ...
