Deciding where solar projects will be installed is one of the very first decisions to be made in a project development timeline. Explore the many factors to consider when selecting a site.

Understand the local solar market, including the price and availability of solar technologies, tax incentives, subsidies, and the operations of local solar developers and installers.

Local economic development: Going solar can help municipalities jump-start the local clean energy economy. You can use the installation to educate constituents about renewable energy.

DOEE has teamed up with EnergySage to help District residents make the switch to solar energy by installing solar panels on their property or subscribing to a local community solar farm.

Solar Powering Your Community: A Guide for Local Governments has been developed by the U.S. Department of Energy (DOE) as a comprehensive resource to assist local governments and ...

Community solar projects are located in 43 states and the District of Columbia. Community solar projects represent greater than 11 GW-AC of total installed capacity.

As part of our commitment to sustainability and renewable energy, CNUSD will be installing solar panels at all District sites.

It introduces community solar programs and their benefits, explains different ownership models, and ends with the best practices to keep in mind when starting a locally-owned community solar project.

Currently, there is at least one community solar project in 44 states and localities, including the District of Columbia (DC). Of those, 24 have passed "enabling legislation" that encourages or mandates ...

This slide deck gives an overview of community solar. It introduces community solar programs and their
