The main energy storage method in the EU is by far "pumped storage hydropower", which works by pumping water into reservoirs when there is an electricity surplus in the grid - for example ...

The EU is investing EUR650 million in cross-border energy infrastructure. The largest single grant has been awarded to the Aguayo II pumped-storage hydroelectric project, which will expand ...

This innovative tool systematically catalogizes all energy storage projects within Europe, from the first planning phase to operational operation.

The European Energy Storage Inventory, developed by the Joint Research Centre (JRC) of the European Commission, is a new interactive platform that maps and analyzes over 1771 energy ...

The EU, UK, Norway, and Switzerland together are expected to reach 100 GW of installed energy storage later this month, according to new analysis launched at the Enlit Europe ...

Explore how Europe is leading the charge in energy storage solutions for power plants. From grid stabilization to renewable integration, discover cutting-edge technologies reshaping the EU's energy ...

The EU installed a record 27.1 GWh of new battery storage capacity in 2025, driven by utility-scale projects that accounted for over half of new additions as the bloc races to build the ...

The goal is to list all planned and operational energy storage projects in Europe by location and technology. The dashboard can be filtered by country, project status and technology.

There are 147 energy storage projects under construction in Europe, with a total capacity of 14 GW, according to the European Energy Storage Inventory, launched by the European ...

The project demonstrates European Energy's approach to enhancing asset value through storage integration

EU power plant energy storage projects

and flexible system operation. The battery enables electricity generated during ...
