-----

Despite the backlash, industry analysts expect the growth of big batteries to continue, driven by their role in preventing blackouts and reducing power prices, although future proposals may...

BESS: A stationary energy storage system using battery technology. The focus of the database is on lithium ion technologies, but other battery technology failure incidents are included.

Let's catch up on what happened in this fire, what the lingering concerns are, and what comes next for the energy storage industry.

A fire at the world's largest battery storage plant in Northern California last month sent plumes of toxic smoke into the atmosphere, it sparked conversation about the industry's storage...

A fire triggered by a lithium-ion battery explosion on the evening of Sept. 26 has paralyzed a large swathe of South Korea's online government services and provoked urgent ...

The Moss Landing facility was originally constructed in a repurposed 1950s-era power plant building, which lacked modern compartmentalization and fire suppression measures. Unlike newer battery ...

More and more, big arrays of lithium-ion batteries are being hooked up to electrical grids around the U.S. to store power that can be discharged in times of high demand.

This webpage includes information from first responder and industry guidance as well as background information on battery energy storage systems (challenges & fires), BESS installation ...

The global energy storage sector is on track for another record year in 2025 as utility-scale projects expand into new regions. BloombergNEF (BNEF) forecasts that developers will add 94 ...

MOSS LANDING, Calif. -- Hundreds of people were ordered to evacuate and part of Highway 1 in Northern

# Energy Storage Battery HIT

California was closed early Friday after a major fire erupted at one of the ...
