Does Gelephu mindfulness city need a single source of energy?

However, as we stand on the cusp of an ambitious future alongside the aspirations of a modern and developed economy coupled with pathbreaking Gelephu Mindfulness City (GMC), reliance on a single source of energy, however abundant, is no longer sufficient for our long-term energy security, resilience and sustainable growth.

What are the responsibilities of the Ministry of Energy & Natural Resources (moenr)?

5.1 The Ministry of Energy and Natural Resources (MoENR) shall be responsible for formulating and guiding policy within the energy sector. 5.2 The MoENR shall facilitate issuance of clearances concerning environment, forest, water, land, cultural and other approvals for development of renewable energy projects.

Are run-of-river hydropower schemes in Bhutan adapted?

As current run-of-river hydropower schemes in Bhutan have become increasingly vulnerable to decreasing water flows in the dry season the SHDP emphasises adaptation measures such as reservoir/pumped storage schemes.

What is a restraining energy consumption?

Shall mean a way of managing and restraining the energy consumption such that less energy is used to provide the same service or output using advanced process, technology or equipment. Shall mean those consumers (HV and MV industries) with contract demand of more than or equal to 2 MW.

The feasibility of a waste to energy plant of utility scale in Thimphu will be undertaken and implemented to convert the organic waste to energy and reduce landfill emissions.

Development of National Clean Air Action Plan for Bhutan On September 15, 2025, the Department of Environment and Climate Change, Ministry of Energy and...

The Bhutan Ecological Society promotes and scales renewable energy solutions, advancing sustainable development, reducing carbon emissions, and fostering energy security to support resilient ...

For Bhutan, long-term energy security means meeting winter demands when our hydropower generation ebbs to the lowest.

Energy conservation thimphu

Enhance the climate resilience of Bhutan's energy sector by diversifying renewable energy generation, distribution and storage options while mitigating climate impacts on infrastructure and services.

With hydropower providing 80% of its electricity, Thimphu's facing a modern dilemma: how to store surplus monsoon energy for dry winters. The Thimphu Power Storage initiative, launched in 2023, ...

This study aims to find the energy-saving potential of Bhutan by analyzing future energy demand from the residential building sector using a scenario-based modeling tool called Long-range Energy ...

Thimphu's energy transition demands smart, adaptable solutions. Containerized storage systems offer the flexibility Bhutan needs to maintain its carbon-negative status while powering economic growth.

The estimated final energy yield and PR aligned with findings from countries like Saudi Arabia, India, and Pakistan, highlighting the strong solar energy potential in Thimphu.

While continuing to honour hydropower, the policy moves decisively toward renewable diversification, energy security, climate resilience, and economic transformation to meet Bhutan's ...
