The present invention relates to thermal energy storage systems and applications thereof.

There are known technologies to use the outdoor cabinets or the combined base stations to solve the problem of traditional container energy storage systems. However, the outdoor cabinets ...

This patent search tool allows you not only to search the PCT database of about 2 million International Applications but also the worldwide patent collections. This search facility features: flexible search ...

In some application scenarios, the overall size of the energy storage container is often restricted, for example, during transporting the energy storage container, and the loading ...

The invention further relates to an associated container logistics system comprising a plurality of mobile freight containers (10, ..., 10") and various transshipment and/or transport...

A hybrid compressed air/water energy storage system is described. The system includes a series of water containers and a plurality of inflatable bladders held within each container. An air ...

This paper studies the management of transshipment flows in a container terminal. Management consists of designing a visiting schedule template for feeder vessels and determining storage ...

The container and other components can be assembled into an energy storage platform. For example, the container can substantially enclose a plurality of battery strings within the platform.

FIELD OF INVENTION [0002] The present invention relates to a ventilating container for example particularly, but not exclusively, a ventilating container for containing one or more energy storage units.

Taking a 20-foot 5MWH liquid cooling energy storage container as an example, the energy storage container 1

Energy storage container transshipment patent

includes a length extending along its length direction X, a width extending ...
