-----

This year, its 40th edition centred on bringing solar plant production back to Europe - with Germany in the spotlight. After all, it was forty years ago that Germany brought solar cells and ...

To close this gap and meet growing demand, urgent and coordinated policy action is needed to strengthen the EU's supply chain, meet NZIA targets, and restore competitiveness - ...

The European Union tandem solar photovoltaic (PV) modules market stands at the precipice of a transformative decade, transitioning from a nascent, R& D-intensive sector to a ...

These cells are assembled into solar panels and then installed on the ground, rooftops or floating on dams or lakes. The EU funds many solar cell projects, such as the PERTPV project, in which ...

What are the optimal levels of strategic solar module stockpiles in the European Union (EU) for achieving climate neutrality by 2050, and how might such stockpiles influence efforts to ...

A report by SolarPower Europe and Fraunhofer ISE finds EU-made solar modules cost EUR0.103 (\$0.12)/W more than Chinese imports, but targeted policies could close the gap and help ...

This guide explains how requirements from regulations and directives, such as the General Product Safety Regulation and the Low Voltage Directive, apply to solar panels sold in the ...

Executive summary The European Union plans a major increase in solar PV capacity from 263 GW today to almost 600 GW by 2030. If nothing changes, this expansion will be based almost ...

Discover the state of solar panel manufacturing in Europe, the challenges posed by imports, and what EU countries are doing to rebuild local production. Learn how European-made solar can boost ...
