Specifically, the tool will help French and Australian companies prepare for bids and projects in Australia, while also assessing the most viable export pathways to Japan and France.

In an era of escalating energy costs and climate urgency, installing photovoltaic solar panels in private homes has emerged as a compelling option for households in France and Victoria, ...

In 2024, France set a new benchmark for PV deployment, installing over 6 GW of new PV capacity. This marks the strongest year on record for PV in France, underscoring the country's commitment to ...

Australia approved on Wednesday plans for a massive solar and battery farm that would export energy to Singapore, a project billed as the "largest solar precinct in the world".

France is aiming to increase its solar PV capacity from 11.5 GW in March 2021 to 23 GW by the end of 2023. The country offers feed-in tariffs for small-scale solar PV up to 100 kWp on rooftops for self-consumption, with a specific grid tariff for collective users and exemption from the domestic tax on electricity for projects under 1 MW. However, a proposal to reduce solar PV subsidies for ongoing projects until 2030 has created controversy, affecting the sector's growth despite the target of reachin...

In April 2023, President Emmanuel Macron announced plans to double the country's solar power capacity by 2030 and increase wind power by 50%. These targets are ambitious but ...

We are proud to be France's leading independent solar power producer and to be able to offer our major industrial customers clean, locally sourced, competitive electricity and innovative energy solutions.

France is aiming to increase its solar PV capacity from 11.5 GW in March 2021 to 23 GW by the end of 2023. The country offers feed-in tariffs for small-scale solar PV up to 100 kWp on rooftops for self ...

The rise in clean energy supplies came despite year-over-year drops in wind and hydro power production,

France australia solar power

which were offset by record solar generation and the highest nuclear power output ...

Rooftop solar generated power for more than 4.2 million homes and small businesses - delivered 12.8 per cent of Australia's electricity in first half of 2025.

These regions currently have the largest installed capacities, accounting for 52% of France's total solar power in the third quarter of 2024.
