-----  
What is heliup's new lightweight panel technology?

In response to the incompatibility between conventional photovoltaic solutions and large steel-framed buildings, HELIUP is developing and producing an innovative lightweight panel technology developed by the CEA. The solution achieves a 60% weight reduction while maintaining high performance and durability standards.

Are Heliatek solar panels eco-friendly?

Sustainable and Eco-Friendly: Heliatek's organic solar films are made from non-toxic, environmentally friendly materials, contributing to a reduced ecological footprint compared to conventional solar panels. Heliatek's HeliaSol caters to a wide array of applications, including:

Can heliup solar power a metal-frame building?

Heliup has designed ultralight, easy-to-install solar photovoltaic panels designed for the structural limitations of metal-frame buildings. The panels can meet 15% to 100% of a building's electricity requirements.

Is heliasol a good solar panel?

Lightweight and Flexible: HeliaSol is significantly lighter and more flexible than traditional glass-based solar panels, making it suitable for applications with weight, space, or architectural constraints.

Heliatek produziert flexible, effiziente und wirklich grüne organische Solarfolien für Gebäude. Stolz als eines der innovativsten Unternehmen der Welt ausgezeichnet.

A lightweight photovoltaic panel In response to the incompatibility between conventional photovoltaic solutions and large steel-framed buildings, HELIUP is developing and producing an innovative ...

German organic PV manufacturer Heliatek has announced a new series of lightweight modules. The Heliasol 436-2000-CFE-45-600V panels are ...

Heliup is a startup specialized in the development and production of lightweight photovoltaic panels for large roofs on existing buildings.

Heliatek a German company introduced HeliaSol, a flexible, ultra-lightweight and ultra-thin, which enables

# Heli Photovoltaic Panel

more surfaces to become energy generator. HeliaSol transforms buildings into ...

Discover Heliup's new lightweight, frameless bifacial solar panels designed for commercial and industrial flat roofs. Learn how they boost energy output and safety.

Premium Solar PV Modules. Built in America to Power the Nation Secure your supply chain with IRA-compliant solar modules. Our just-in-time-supply solution and in-house logistics team ensure you get ...

German organic PV manufacturer Heliatek has announced a new series of lightweight modules. The Heliasol 436-2000-CFE-45-600V panels are IEC 61215 and IEC 61730 certified and ...

Ultra-Light Because of its unique layer structure in the solar film, it made up of plastic films and a very thin organic photovoltaic layer. Therefore, HeliaSol has a total weight of very low less than ...

The company caters to a wide range of customers in segments like building materials, automotive, and urban infrastructure. With a steadfast commitment to driving innovation and ...

Solar panels are evolving with ever-higher levels of power and reliability. However, their considerable weight, combined with the fixing structures (~ 15 kg/m<sup>2</sup>), is not compatible with a large proportion of ...
