-----  
Does Madagascar have a 4G network?

Internet coverage across Madagascar remains uneven. In 2023, the introduction of 5G brought 28 sites online across six newly connected municipalities, but 4G, with 3,568 sites, remains the most widespread technology. ARTEC reports that 68 % of the country is covered by 4G.

How many 5G base stations are there in the world?

In addition, a total of 819,000 5G base stations have been built by these three telecom giants, accounting for 70% of the world's total. As China has played a leading role in 5G technology, its 5G development has extraordinary significance for other countries.

Will 5G be available in Madagascar?

The company said Madagascar would be "the first African country to benefit from the new generation of mobile connectivity." However, ARTEC pointed out that Telma was not granted authorization to market 5G services on the Malagasy market, but rather a temporary authorization to experiment with the technology for one month.

How many internet providers does Madagascar have?

Madagascar currently has five internet service providers, three of which also operate in the mobile telecom sector. In 2023, mobile data services generated 172 billion MGA in revenue, equivalent to over 37 million USD, marking a 37.4 % increase from the previous year.

Internet coverage across Madagascar remains uneven. In 2023, the introduction of 5G brought 28 sites online across six newly connected municipalities, but 4G, with 3,568 sites, remains ...

Number of base stations deployed and coverage of market population worldwide. Includes summaries and data tables for BTS and NodeB and population coverage.

Comparison of the number of 5G base stations in the European Union (EU) and selected countries worldwide in 2024 [Graph], European 5G Observatory, June 30, 2024.
