How much power does Somalia have?

Current generation capacity is 106 megawatts, largely composed of expensive and pollutant diesel generators, though Somalia has great potential for solar and offshore wind power generation that can support a transition to green energy and reduce GHG emissions.

Does Somalia have a power grid?

There is no national power grid. Diesel generators are the primary source of electricity. Most generators and distribution equipment are old and inefficient, resulting in a low-quality electricity supply. Regarding costs per kilowatt-hour of electricity, Somalia has one of the highest unit prices in Africa.

How many people in Somalia have access to electricity?

While variations exist between rural and urban areas, in 2023 the Somali Household Budget survey estimated more than half of the population (61.9 percent) had access to electricity, demonstrating progress on the expansion of electricity services in the country.

What kind of energy is used in Somalia?

Domestic use of energy: Most Somali households use fossil fuels such as charcoal and firewood for household cooking. Charcoal (47.9 percent) and firewood (41.3 percent) are the two energy sources most used for cooking, while gas or electricity are only minimally used.
