How long does solar installation take?

The process from selecting a solar installer through installation through to receiving permission to operate from a local utility can often take several weeks or even several months. How long is the solar payback period?

How long does it take to get rooftop solar panels?

If you've decided to get rooftop solar panels, be patient -- it'll take a few months before you see those savings in your electric bill. Installing solar isn't as a quick-turnaround project as you might expect.

How long does a solar project take to complete?

Most projects will take 60-90 days to complete, if all goes well. Why trust EnergySage? You've made the decision, you've signed the contract: You're getting solar panels for your house! Now what? How soon until those rooftop panels are soaking up the sunshine, feeding clean energy to your home, and slashing your power bills?

How long does it take to get solar power?

It can take a few months to go from signing a contract to generating solar power. Installers handle this step slightly differently. Increasingly, companies are doing preliminary designs and quotes remotely. But in most cases an installer is going to want to take a closer look in person before finalizing the plan and signing a contract.

However, the timeline can vary depending on a few factors, including how complex your installation is and how long permitting takes. In this guide, we break down a typical residential solar ...
