What is kilowatt per rack?

Kilowatt per rack (kW/rack) is the power assigned to a server rack in a data center. It is measured in kilowatts (kW) and represents the total power needed for all IT equipment in that rack. Colocation providers offer different power levels: Power density depends on server type, workload, and cooling efficiency.

How much electricity does a 2000W rack use?

Example: A rack using 2000W running 24/7 ( $2000 \times 1000 \times 24 \times 365 = 17,520$  kWh/year) Check your electricity bill or contact your utility provider to find out the cost of electricity per kWh.
