Hungary enhances its energy self-sufficiency by installing modern-day storage facilities and doubling the capacity at Soroksar to absorb solar energy and fortify the grid stability.

With its ongoing investments in BESS projects across Europe, such as the recent acquisition of the French battery storage operator and developer Comax in 2024, MET Group aims to ...

Hungary's EUR2.1 billion residential battery subsidy marks a decisive step toward a storage-driven energy system. As solar penetration rises and grid flexibility becomes critical, battery energy ...

Teplöre is proud to announce the successful commissioning of its first Battery Energy Storage System (BESS) project in Budapest, Hungary. This milestone marks a significant step in our ...

With this latest BESS plant which went into operation today, MET Group and the Dunamenti Power Station are further strengthening their contribution to the energy transition in ...

Hungary's largest operating standalone battery energy storage system (BESS) has been inaugurated today. MET Group put into operation a battery electricity storage plant with a total ...

E.ON Hungaria has unveiled a state-of-the-art storage system in Soroksar (23rd district of Budapest), doubling its local capacity and setting a new benchmark for smart grid integration in the ...

Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition.

In 2024, MET Group acquired Comax, a French operator and developer of energy storage systems, significantly expanding its capabilities in this area. The company is also developing ...

European energy company MET Group has inaugurated its 40-megawatt battery storage system in

Hungary energy storage technologies

Százhalombatta, Hungary, indicating a strong push toward renewable energy for the region.
