INJET's Hybrid Energy Storage System (HESS) delivers fast, reliable power during disaster emergencies. Designed for rapid deployment, HESS ensures continuous energy supply for rescue, ...

The EMEX Power inverter and charger modules utilise solid state electronics of the highest reliability to provide a rugged, easy to maintain system with exceptional performance for emergency lighting use.

In the power range up to 6300 A, Kuhse controls and switch#gears secure the emergency power supply of safety-relevant consumers, worldwide and especially in critical infra#struc#tures.

The product range includes complete systems with a central or decentralised power supply for up to 50,000 luminaires. The various systems can be combined with one another, can be ideally adapted ...

Specifically designed for emergency lighting applications where space is limited and features all the high performance, low maintenance features of the EMEX Power range.

Hybrid power solutions and sustainable energy systems designed to deliver reliable emergency power for critical and remote infrastructure needs.

By laying the foundation for low-emission energy solutions tailored to the needs of emergency response organizations, POWERBASE addresses both immediate and future demands for resilient, ...

ETAG has developed and engineered hybrid emergency lighting solutions in collaboration with world-renowned European manufacturer"s, who have a proven performance track record of over 30 years ...

A central battery system from our WFZB series supplies power from a safe area to emergency luminaires in

Hybrid type of Central and Eastern European power cabinets for emergency rescue

potentially explosive atmospheres and to those areas which are not potentially explosive.

Hybrid Power Control Software gives your installation full control of Hybrid propulsion with possible modes of operation: electric-diesel automatic- generator and Back-Up mode: bypass of hybrid control ...
