Promoting Renewable Energy: Hyon Energy is at the forefront of promoting renewable energy solutions like solar, wind, and biomass. We provide comprehensive services from feasibility studies to project ...

From solar panels that turn sunlight into electricity to wind turbines that harness the earth's natural currents, the possibilities are as vast as the sky above us.

HYON offers systems for renewable hydrogen production, storage, dispensing and electricity generation via fuel cells on board ships.

Using cutting-edge technology and thinning out of the box, HYON is on its way to delivering cost-efficient and eco-friendly hydrogen-delivery services.

Specializing in decarbonization, solar PV agri-voltaics, waste-to-energy, and energy data management, she aims to enhance land use efficiency and promote sustainable environment.

Under the multi-billion NOK contract, to be deployed from 2020, Nel will deliver up to 1 GW of electrolysis plus fueling equipment. Nel ASA to provide engineering, electrolysis, and fueling ...

HYON delivers tailor-made hydrogen fuel cell solutions to land-based industries - and also to the maritime market. HYON's solutions enable electricity to be stored and used at a later point, ...

Partner with Hyon Energy and take a significant step towards a sustainable and energy-efficient future. Let us help you navigate the complexities of the energy landscape and achieve your sustainability ...

By combining solar power with gas gensets, businesses can achieve a stable power solution, benefiting from reduced environmental impact and financial incentives for renewable energy investments.
