-----

Record-low bids to build battery energy storage systems in India have sparked fears that some projects could be economically unviable and even pose safety risks, industry experts and...

India's Union Budget 2026 boosts lithium-ion battery manufacturing for BESS with customs duty exemptions, accelerating grid-scale energy storage and renewable integration.

This comprehensive review provides a strategic roadmap for overcoming infrastructural, environmental, and technological barriers to support India's transition toward energy resilience and ...

India Energy Storage Alliance (IESA) is a leading industry alliance focused on the development of advanced energy storage, green hydrogen, and e-mobility techno

Between 2022 and May 2025, India auctioned approximately 12.8GWh of battery energy storage system (BESS) capacity for both hybrid and standalone applications. However, only about ...

India's battery energy storage capacity is set to rise nearly ten-fold to around 5 GWh in 2026 from 507 MWh in 2025, reflecting a shift from tendering to execution of projects.

Union Budget 2026 prioritises electric mobility with customs duty exemptions on battery manufacturing, support for lithium-ion cells, and incentives for energy storage and rare earth ...

Offgrid Energy Labs, a deep-tech startup based in India, wants to make lithium less central, especially when it comes to battery storage. The 7-year-old startup, incubated at IIT Kanpur,...

Grid Scale Energy Storage: The Union Budget 2026-27 introduces exemptions on capital goods for lithium-ion battery manufacturing and sodium antimonate for solar glass, aiming to boost ...

Explore this article to understand India's booming battery storage sector, crucial for unlocking renewable
