What is integrated solar street light?

The Integrated Solar Street Light (i.e. All in Two Solar Street Light) is integrated by the PV panel system and lamp fixture. Different with traditional solar street light, it split the whole solar led street light into two parts -- The solar power lighting system and the led fixture. Hence it's quite easy for installation and maintenance.

Why should you choose integrated solar street lights?

Integrated solar street lamp promotes safety for drivers as their illuminance is greater than traditional street lights. You can install them effectively on main roads, highways, rural roads, and roadways. Installation is very easy and price per street light unit is cheaper than other brands.
