Are solar panels illegal?

Technically, no state outlaws or bans solar panels; quite the opposite. Most states have solar access laws that forbid any agreement, covenant, condition, bylaw, or contract that outlaws or limits solar installations by Homeowners Associations (HOA) or other municipal bodies.

Should solar panels be installed over canals or reservoirs?

Putting panels over canals or reservoirs would make use of space that's already been modified by people, and it wouldn't require clearing additional land for huge solar farms.

Are solar panels a viable option?

However, some states still make installing solar panels functionally impossible by creating laws with "reasonable restrictions," such as increased taxing, energy caps, or even billing solar panel users. Combine these laws with a lack of incentive programs, and solar panels are not viable for homeowners in many states.

Can a Hoa prohibit solar panels?

Under the Virginia Code, HOAs cannot prohibit the installation of solar power collection devices on your property. Associations can only restrict installation if their recorded declaration specifically mentions such restrictions. For instance, associations set reasonable restrictions on the size of solar panels and where and how they are installed.

Putting panels over canals or reservoirs would make use of space that's already been modified by people, and it wouldn't require clearing additional land for huge solar farms.

Navigate solar panel disputes with HOAs and neighbors. FindLaw explains your legal rights, state laws, and solutions for resolving conflicts.
