---

In order to provide power reserves, with Decree No.674 of 24 September 2024, the Republic of Latvia's Cabinet of Ministers gave permission for AST to acquire, install and operate ...

Secure Latvia's power grid with Rolls-Royce's large-scale battery storage, syncing Baltic energy with Europe by 2025.

The first BESS projects are being implemented in Latvia and at Latvenergo production sites - starting with the smaller-scale BESS at Latvenergo AS CHPP-1 and continuing with larger ...

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in ...

The planned electricity storage station will expand the possibilities for balancing electricity capacity in Latvia and the Baltics, while simultaneously strengthening the country's energy security ...

The addition of two utility-scale battery energy storage systems (BESS) in Latvia marks the final milestone in synchronizing the Baltic power grids with continental Europe, according to the ...

Once operational, it will be among the most advanced hybrid renewable facilities in Latvia. The storage system is designed to support grid stability, balance electricity supply and ...

Independent renewable energy producers are considering different ways to add energy storage to solar and wind generation. Local authorities support decentralized renewable energy and ...

In Latvia, developer Utilitas Wind announced the official opening of a 10MW/20MWh battery energy storage system (BESS) last week (1 November) in Targale, a village in Latvia's north ...

# Latvian Smart Energy Storage Power Station

A joint Estonian-Latvian state-run cross-border offshore wind project aiming to raise energy independence in the region by increasing production of green energy and improving interstate ...
