---

To participate in V2G programs, a bidirectional DC charger and a compatible EV is required. Of course, there are some financial incentives to do this, and EV owners are generally ...

Discover how Solar & Storage Live London is driving thoughtful eco-friendly practices, responsible partnerships, and innovative initiatives to reduce our environmental impact.

Our test drivers (a mixture of visitors and local residents) are able to schedule their departure times and minimum battery levels, so that our bidirectional charging system can store and ...

London Charging is an independent family business, with over 50 years combined experience within solar, battery and electric vehicle expertise. We're accredited by MCS, TrustMark and the HIES ...

The equipment operates four hours per cycle and recharges in 45 minutes, integrating with a yard-management digital twin that optimises container moves in real time.

EV specialist Fellten has launched a new all-in-one charging system designed to speed up the UK's electric transition by removing the need for planning permission. The innovative Fellten ...

The straddle carriers will be fitted with two different charging technologies: a standard CCS2 charging interface that is compatible with any commercial charging station, and a megawatt ...

A "bidirectional charging" EV trial is under way that, in years to come, could help solve the UK's energy conundrum.

To get around these problems, Bristol-based electric car specialist Fellten has developed a "portable" EV charger solution that makes use of recycled electric car batteries and old shipping...

# London Solar Container Two-Way Charging

The unit is built around a recycled shipping container and can support up to 12 fast EV charge points. The solar and battery-boosted charging system optimises the speed of charge and reduces the ...
