In this report, it was revealed that around $\text{\$}200$ billion-worth of solar, battery, and onshore wind projects were currently waiting in a queue for the grid. These delays, where some projects are ...

UK energy regulator Ofgem has approved connection queue reforms for Great Britain's electricity grid. The change could see 65 GW of solar projects enter the fast-track "Gate 2"...

LDES projects include pumped storage hydro, compressed air and liquid air energy storage and flow batteries. AG's Energy team looks at the detail behind the scheme proposals and ...

Long-duration energy storage technologies store excess power for long periods to even out the supply. In March 2024, the House of Lords Science and Technology Committee said ...

Over summer Statera Energy's Thurrock Storage project, the country's biggest battery energy storage system (BESS), connected at our Tilbury substation in Essex to add 300MW of flexible capacity ...

UK grid connection reform is reshaping the financing and development of solar and storage projects, with implications extending beyond Britain.

Renewable energy and battery storage site developers are warning that a wait of up to 13 years to connect to Britain's energy grid is threatening investment and undermining the shift away...

The Applicant has received a grid connection offer from Northern Power Grid as the DNO to connect the Proposed Development to the NETS via the existing Norton Substation and that offer has been ...

In this Q& A, Willis discusses the UK's grid connections reform, the long-duration energy storage (LDES) cap-and-floor, as well as the evolution of financing, commercialisation and project ...

London solar energy storage grid connection

The UK has quietly emerged as Europe's most dynamic grid-scale battery storage market, with Solar Media reporting 61.5GW of planned or operational projects--enough to power ...
