---

With the patented technology of virtual synchronous machine features, it can realize the function of multiple remote free parallels without communication lines and off-grid switching;

The system features millisecond-level on/off-grid switching, capable of independently forming a large-scale, stable microgrid to ensure zero interruption to critical production loads.

50kW/100kWh outdoor cabinet ESS solution (KAC50DP-BC100DE) is designed for small to medium size of C& I energy storage and microgrid applications. Individual pricing for large scale projects and ...

The ESS-GRID Cabinet series are outdoor battery cabinets for small-scale commercial and industrial energy storage, with four diferent capacity options based on diferent cell compositions, 200kWh, ...

This integrated solar battery storage cabinet is engineered for robust performance, with system configurations readily scalable to meet demands such as a 100kwh battery storage requirement.

All-in-one design, integrated with PV. ESS and D.G., smart air-cooled heat dissipation, single cabinet capacity of 215kWh. Suitable for industrial and commercial scenarios, which supports functions like ...

All-in-one Design Integrated PV and storage system with super wide PV input voltage Small footprint and IP54 protecting grade for outdoor installationenvironment; Safe & Reliable High-performance ...

Ensures automatic and seamless switching between grid and off-grid modes for uninterrupted power. Connects grid and backup generators for flexible power input. Supports electric vehicle (EV) ...
