This work presents a library of microgrid (MG) component models integrated in a complete university campus MG model in the Simulink/MATLAB environment. The model allows simulations ...

Not all the complex characteristics of the hybrid microgrids can be studied in a single research project; hence this master thesis focuses only on a specific target case study: sizing, modeling, and ...

Microgrids are electricity distribution systems containing loads and distributed energy resources, (such as distributed generators, storage devices, or controllable loads) that can be operated in a controlled, ...

The final simulation for this project was created using PSCAD which allowed the validation of the system's performance under various conditions, such as grid outages and load transitions. The ...

oned literature presented single renewable source micro-grids. The current work presents the simulation of a micro grid model that includes two renewable energy sources; Photovoltaic (PV) and a wind ...

The system uses advanced forecasting and metaheuristic optimization (Cuckoo Search Algorithm and Particle Swarm Optimization) to find optimal dispatch solutions. It's a practical example for those in ...

Abstract The thesis presents the design and simulation of a microgrid system for a university community in Nigeria. Firstly, the system sizing and design was done in Homer Pro software where the microgrid ...

This repository shows how to develop, evaluate, and operate different types of microgrids.

Graduation Project: Smart Distribution System and Microgrid Modeling Using MATLAB/Simulink I'm proud to share our fully accomplished graduation project, where we designed and analyzed a...

Explore innovative microgrid project ideas for electrical engineering students. Learn about renewable integration, energy management, smart grids, islanded and grid-connected ...
