Pasternack RF mobile radio antennas are designed for outdoor mobile applications, typically mounted onto vehicles. They are designed to perform in the VHF, UHF, Cellular, PCS, ISM, Dual Band ...

Discover the best GMRS antennas for mobile, base station, and handheld radios. This comprehensive article will help you make perfect choice.

After testing eight models for 90 days on my rooftop rig, I collected data on field strength and SWR. I compiled the definitive list of the best base.

?10 dBi High Gain Design?With its high 10dBi gain, this antenna is built ...

HYS Pre-Tuned 462MHz-467MHz UHF Amateur Base Antenna, GMRS Base Station Antenna, Outdoor 7.5ft (86.6inches) Long-Range 8.5dBi, Pole Mast Mount (SO239-UHF Female)

Designed for telecom operators and critical infrastructure deployments, these antennas are ideal for urban, suburban, and highway scenarios where consistent outdoor signal performance is ...

This station integrates advanced Hybrid energy system technology, excels in outdoor base station performance, and leverages an Intelligent energy management system for smart ...

A gain of 3.5 dBi enhances the overall strength of the signal, improving the quality of your transmissions. The frequency range of 26-28MHz ensures compatibility with a wide range of radios ...

?10 dBi High Gain Design?With its high 10dBi gain, this antenna is built to pinpoint and amplify weak signals, significantly improving reception in challenging locations and maintaining a stable connection ...

UHF 433MHz Antenna is with high gain 9 dBi, it can effectively enhancement the signal for your 2-way radio or transceiver. 100W Maximum Power Input make it work with most mobile radio ...

Mobile base station outdoor gain

Experience extreme range and long distance communication with CB radio base station antennas. They are the go-to for both hobbyists and professionals alike.
