Natron Energy batteries and systems outperform lithium-ion and lead acid batteries in power density, recharging speed, and expected lifecycle thanks to our unique sodium-ion battery technology.

Founded in 2012, Natron patented a unique battery from an electrode family called Prussian blue, which produces longer-lasting batteries when ...

Discover our battery safety, including how sodium-ion batteries are inherently safe, non-hazardous, & nonflammable.

Sodium-ion battery manufacturer Natron Energy has ceased operations, according to its website, halting plans for a giant factory in Rocky ...

Sodium-ion battery startup Natron ceased operations this week, ending the company's 12-year quest to commercialize its technology in the U.S.

Natron achieved genuine technical milestones that distinguished it from typical battery startups. In 2020, it became the first sodium-ion battery to ...

Natron Energy, a Santa Clara, Calif.-based sodium-ion battery startup, ceased operation on 3 September due to funding issues.

Read more about the industry's highest power, longest life, safest battery - the BluePack(TM) Critical Power Battery.

Natron's revolutionary sodium-ion battery technology leverages Prussian Blue electrode materials to deliver a high power, high cycle life, completely fire safe battery solution that's created sustainably ...

Natron had positioned itself as a leader in sodium-ion battery innovation, developing a proprietary technology

Natron battery

based on Prussian blue electrode materials. The company's batteries promised faster ...

With our original location in Santa Clara, California, and our newly opened manufacturing plant in Holland, Michigan, Natron Energy batteries are entirely designed and made in the U.S.A.

Our batteries deploy their energy load immediately with no settling or thermal waiting. In addition, Natron sodium-ion batteries deliver up to 10 times as many deep discharges as lithium-ion batteries and 50 ...
