Representing Nepal at the launch were Nepali Ambassador Bharat Kumar Regmi, Gham Power CEO Anjal Niraula, and teams from Swanbarton and Practical Action. This groundbreaking ...

As Nepal accelerates its transition to clean energy, the Kathmandu Solar Energy Storage Production Base has emerged as a cornerstone for sustainable development. This article explores how cutting ...

This paper presents a review of energy storage systems covering several aspects including their main applications for grid integration, the type of storage technology and the power...

Nepal is advancing with the adoption of intelligent solar storage technologies and this project implements a smart solar micro-grid at the Laxmi Steel Factory in Sunwal.

Nepal's energy future lies not in hydropower alone, but in a combination of hydro, solar and storage. The country receives an average solar radiation of 4.5 to 5.5 kWh/m²/day -...

Since most existing Nepalese hydro is run-of-river, substantial new storage is required to support a solar-based energy system. Nepal has enormous potential for the deployment of off-river ...

This study explores pathways to 100 % renewable energy by transitioning end-use sectors to electricity, using an hourly energy balance model of Nepal's future electricity system by 2050.

"This transformative project will revolutionize industrial energy use by replacing polluting diesel generators with a large-scale, solar-powered battery storage system," said Gham Power.

Solar with battery storage presents a timely and strategic upgrade for Nepal's renewable energy sector.
