Commercial taxpayers may now also choose a Production Tax Credit (PTC) for solar instead of an ITC. The PTC rate is 1.5 cents (adjusted for inflation, it is presently 2.6 cents). The full value of the PTC is ...

In this blog, we'll explain what the change means and how to plan ahead to secure your 30% federal tax credit if you're purchasing your system outright before the window closes. Planning ...

Eligible homeowners can claim a tax credit of up to 30% of the total cost of their solar panel installation. This credit directly reduces the homeowner's federal income tax liability, making ...

If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit.

Starting January 1, 2026, the residential solar tax credit disappears completely for customer-owned systems. Third-party owned systems (leases and PPAs) continue to qualify, with ...

To understand why 2025 is such a critical window, let's start with how the federal solar tax credit works and what it covers. How Does the Federal Solar Tax Credit Work? Think of the credit...

Solar Panels or Photovoltaic Systems are solar cells that capture light energy from the sun and convert it directly into electricity. Use this buying guidance to learn more about your options, ask the right ...

Breaking down major changes to federal solar tax credits in 2026 and how homeowners can still access federal incentives through third-party ownership.

Every U.S. taxpayer who purchases a solar installation is eligible to receive 30% of the cost back as an income tax credit in the year after installation. If you're thinking about getting solar panels installed, ...

New tax rate for solar photovoltaic power generation

The Residential Clean Energy Credit allows you to claim a deduction for the cost of new clean energy property, including solar panels. The credit for ...
