Why is electric vehicle adoption a problem in Cyprus?

Despite government incentives, electric vehicle adoption faces obstacles including high purchase costs, limited charging infrastructure, and extended charging times. Cyprus is developing plans for additional charging points whilst manufacturers introduce faster-charging models.

What are the benefits of electric vehicles in Cyprus?

On the benefits of electric vehicles, Karousos referred to low charging costs with a reduction of up to 64 per cent in comparison with conventional fuel, free road tax licence, free parking in some municipal parking areas, low maintenance costs, and reduction of pollutants even in the way energy is produced today in Cyprus.

What is the new electric mobility enhancement scheme for Cyprus?

Read more: Following Wednesday's Cabinet meeting on 25 June 2025, Transport, Communications and Works Minister Alexis Vafeades announced a new electric mobility enhancement scheme for Cyprus, approved by the Council of Ministers and aimed at strengthening the market for fully electric and hybrid vehicles through state resources.

Why is Cyprus launching a new charging point?

Cyprus is developing plans for additional charging points whilst manufacturers introduce faster-charging models. The Road Transport Department previously cited low public response as justification for earlier programme termination, highlighting ongoing challenges in transitioning Cyprus's vehicle fleet toward electrification.
