In 2024, Anern deployed 50 sets of 10.2kW off grid solar power generation systems for residential households in Ukraine. These systems are installed and distributed through authorized local agents, ...

Rolling blackouts are the reality of everyday life in Kyiv, the capital of Ukraine. Russia's war is increasingly targeting the civilian population and the country's electricity infrastructure, in a bid ...

Microgrids' ability to supply power is important in Ukraine, where Russian attacks have destroyed much of the grid. In some areas, Ukrainians have deployed diesel generators, but they can't always supply ...

Ukraine is making a "strategic shift" toward distributed energy resources. In the two and a half years since Russia invaded Ukraine, Ukraine's energy system has been a regular target, with ...

Russia's constant bombing of Ukraine's power grid has sparked a groundswell of innovation in clean, reliable energy across the country--from building microgrids to solar power stations.

The OMM-Ukraine: Optimised Microgrid project offers sustainable, efficient, and scalable AI-powered clean energy solutions to provide reliable electricity to off-grid communities, enhancing ...

This gap makes it financially unviable to generate more electricity due to the need to pay for grid transit once connected. To address these issues, Ukraine must develop a clear algorithm for ...

Following three years of bombardments and damage to its energy infrastructure, Ukrainian businesses are turning to self-consumption solar PV systems to keep the lights on.

After months of targeted strikes and structural losses, we break down what still holds the grid together, where the weakest points lie.
