What is the Invesco solar ETF?

The Invesco Solar ETF focuses on companies in the solar energy industry. That includes companies that manufacture panels and electrical components and install solar energy systems. The ETF had almost 30 holdings as of late 2025, led by the following five:

Is tan a good solar ETF?

TAN tracks the MAC Global Solar Energy Index, which is market cap weighted, meaning its performance is dominated by the largest solar players and tends to swing more sharply than diversified clean-energy ETFs.

How many wind energy companies does a wind energy fund hold?

It holds two types of wind energy companies: Pure-play companies that get at least 50% of their revenue from wind-related activities (60% of the fund). Diversified companies that have some involvement in the wind industry (40% of the fund). This fund had about 45 holdings in late 2025, led by the following five:

Is Bloom Energy a good energy storage stock?

Bloom Energy is one of the smaller picks on this list, but it may be the most dynamic energy storage stock out there. It specializes in advanced fuel cell energy platforms, which use a proprietary solid oxide technology to convert natural gas, biogas or hydrogen into electricity with low or even zero carbon emissions.
