The large-area photovoltaic power generation is installed in desert mountains and open fields. Strong vibration can be generated under the condition of strong wind and storm, and the single thin...

The Halfen Detan Rod system is an innovative product solution with maximal aesthetic, quality and safety relevant characteristics. The technically sophisticated system is easy to install and is suitable ...

Formwork tie rods play a crucial role in the construction process by providing stability and support to formwork structures, allowing concrete to be shaped and set properly in various ...

Photovoltaic panels are installed on the photovoltaic support purlins. The reciprocating rotation (tilt angle) of the axis bar allows the panel to receive direct sun.

To improve the span and stiffness and widen the application scene of the flexible photovoltaic support system, a new type of three-dimensional cable-truss flexible photovoltaic support system is proposed ...

Based on a typical photovoltaic support failure case, this study involved detailed research on the design load and joint connection measures of photovoltaic supports.

The results show that the photovoltaic support brackets and connections have good resistance to the tension and compression loads, and the reasonably designed brackets can improve ...

The invention belongs to the technical field of solar photovoltaic power generation, in particular to a push rod in a uniaxial photovoltaic support, wherein the uniaxial photovoltaic support comprises a column, ...

The accuracy of the flexible support photovoltaic module system tensioning is very important to ensure construction safety in the process of tension and to evaluate the health state ...

Photovoltaic support tension and compression rod
