The USPVDB Viewer lets you discover, visualize, and interact with the USPVDB through a dynamic web mapping application.

Here is a map of all utility-scale planned solar projects in United States. Hover over a planned solar project to view information on each project like their name, capacity and construction date.

SEIA makes major solar project data available to the public through the map below. SEIA members have exclusive access to the list as a sortable, searchable MS Excel file that is updated monthly.

This map contains multiple layers showcasing solar infrastructure within the US. The map visualizes solar power plants, electric power transmission lines, and the photovoltaic (PV) ...

Since 2020, DOE's Energy Information Agency has hosted an interactive database with coordinates of the central point of large-scale solar facilities.

Ten-Year Power Plant Site Plan (Site Plan). This Site Plan should include an estimate of the utility's future electric power generating needs, a projection of how these estimated generating needs could ...

Whether you're researching power plants in Alabama or analyzing wind development in Wyoming, our interactive map provides the detailed, accurate information needed to understand ...

This map displays information on location, fuel type, electric generation, generating capacity, ownership, and emissions for over 10,000 power plants across the country.

Most on-site renewable energy projects follow a common project development pathway from a project's conception to its completion. This page outlines the major steps you will take along ...

Power plant photovoltaic energy storage project planning map

The map combines three open energy datasets and allows visitors to explore global power plants and U.S. solar and wind energy projects using text search and map visualization tools.
