What is an outdoor telecom enclosure?

The outdoor telecom enclosures, which are also referred to as telecommunications cabinets, are fully enclosed cabinets that help protect electrical cabling and other equipment from potentially damaging environments. Such damage can be caused by dust, rain, ice, and external heat. What do you need to know about outdoor telecom enclosures?

What is a telecommunications enclosure?

Telecommunications enclosures are used in protecting electrical equipment in charge of transporting voice, video and other data for a number of industries. Telecommunications companies rely on custom and standard NEMA-rated electrical boxes to protect their sensitive equipment.

Are Telecom cabinets waterproof?

Outdoor telecom cabinets are designed to withstand harsh weather conditions. They include features like waterproof seals, UV-resistant coatings, and thermal insulation. These elements protect your equipment from rain, sun, and temperature fluctuations. What materials are commonly used for telecom cabinets?

What are outdoor Telecom cabinets?

Our outdoor telecom cabinets are designed to protect your sensitive network equipment from harsh environments where equipment may be exposed to dust or water. For added protection, there is a water and dust proof polyurethane door joint strip.

Prices for small outdoor cabinets typically range from \$500 to \$2,000, depending on the materials and features. For example, a basic model made from galvanized iron may cost less, while ...
