What is a solar panel roof mount?

A solar panel roof mount (also called a solar racking mount or solar system mount) will hold your solar panels and system in place. The mounting system is a crucial component because it is responsible for securing and stabilizing the solar panels on your roof without compromising the roof's stability or water tightness.

What are the different types of racking for photovoltaic (PV) systems?

The two most popular types of racking for photovoltaic (PV) systems are ground and roof mounts. Ground mounts are typically used in large-scale solar projects and can be used with tilt angles that range from 0 to 40 degrees. The angle is important as it will determine the amount of sunlight your solar panels will receive over the course of a year.
