Why are explosion proof cabinets important?

Their primary purpose is containment in case a protected device explodes within itself. Explosion proof cabinets prevent explosions or infernos from spreading to the surroundings of an internally exploding device. The net outcome is a safer work environment for personnel in industrial facilities that are prone to explosion.

What is an explosion proof enclosure?

Explosion proof enclosures are very critical to industrial facilities, utilities, chemical and oil & gas companies that use or store electrical components and devices in hazardous, explosion-prone environments.

What products are explosion proof?

Enclosures, switches, control stations, starters, isolators & more. We manufacture explosion proof products for hazardous areas Enclosures, switches, control stations, starters, isolators & more. We manufacture explosion proof products for hazardous areas Enclosures, switches, control stations, starters, isolators & more.
