Discover how robotics are transforming solar panel installation--boosting speed, safety, and efficiency on large-scale projects. A game-changing leap for renewable energy.

Today the AES Corporation unveiled a first-of-its-kind AI-powered solar installation robot, Maximo, which works alongside human teams to accelerate project construction.

The AES Corporation, a global power company with generation and distribution businesses, introduced a robot powered by artificial intelligence. Dubbed "Maximo", the robot works ...

Using high-precision visual recognition technology, the robot can accurately detect the structure and spacing of panel supports, ensuring each module is placed quickly and precisely. The ...

AES Corp."s installation robot Maximo eliminates all of the human labor of moving, placing and securing solar panels on utility-scale sites. Each Maximo robot is operated by two people.

Robots from Luminous and Leaping are installing solar panels in large solar installations faster and cheaper than human workers.

On Tuesday, AES Corporation, one of the country"s biggest renewable energy companies, introduced a first-of-its-kind robot that can lug around and install the thousands of heavy panels that...

AES" Maximo, the AI solar robot, automates installation. Accelerate clean energy projects, enhancing safety and speed for a net zero future.

The top line: Maximo, as AES has dubbed its robotic "friend in the field," will help the company build out up to 5 gigawatts of its solar backlog and pipeline in the next three years. The ...

Revolutionize your energy efficiency with our Rooftop Photovoltaic Panel Installation Robot. This innovative

Robot installs photovoltaic panels

machine ensures precise and swift installations, reducing labor costs and installation time ...
