See how PowerFlex helped Port of San Diego deploy a microgrid with 756 kW of solar and a 2.4-MWh battery, saving \$3.2M lifetime. Learn about their transformation.

Find the resources and forms you need to install solar and batteries. To get started with a new solar or battery project, you or your contractor must first submit an SDG& E interconnection application ...

With a \$4.9 million grant from the California Energy Commission, the Port of San Diego has installed a renewable, solar-powered microgrid at the Tenth Avenue Marine Terminal, one of the Port's two ...

The Port of San Diego has completed construction of the microgrid system, including the battery energy storage system and solar PV array. The commercial operation date for microgrid ...

We have around 21 BESS and microgrid sites with 442 megawatts (MW) of utility-owned energy storage and another 40+ MW in development.

Smart integration features now allow multiple containers to operate as coordinated virtual power plants, increasing revenue potential by 25% through peak shaving and grid services.

The Port of San Diego has secured a nearly \$5 million grant for the installation of a renewable, solar-powered microgrid at the Tenth Avenue Marine Terminal, one of the Port's two marine cargo terminals.

This cornerstone project provides renewable, reliable, and resilient power to meet operational needs on TAMT and advances Port emissions reductions goals. The microgrid is made possible by the ...

Background - Naval Base San Diego Energy Resiliency Conservation Investment Program (ERCIP) Project Microgrid with 300 kW Solar PV Supports critical facilities Port of Operations Emergency ...

Small solar container power supply installation at San Diego base station

Sullivan Solar Power is proud to have selected to install solar energy systems for the Port of San Diego.
