Yet only a fraction of this was utility-scale (0.7 GW) and connected to the grid suggesting a paradigm shift in the country's power sector, with rapid growth of small solar PV systems, the actual ...

OverviewChallengesHistoryGovernment policyProjectsFarmingPublic receptionSolar power has allowed Pakistani farmers in isolated regions with limited access to the power grid an alternative way to power tube wells, or pumps that provide groundwater to crops. Diesel-powered generators were traditionally used, but increased prices of diesel fuel due to tariffs on imported fossil fuels and the removal of government subsidies have further incentivized the adoption of solar power. Solar tube wells however are resulting in overuse of ground water resources which if not controlled co...
