This analysis used tracking data from households both with photovoltaic equipment installed and without in "S Town," Jiangsu Province, from 2017 to 2021. The results indicate that ...

To address this gap, this paper aims to reveal the status, collaborative networks, research hotspots, trends and challenges by conducting a scientometric analysis based on 468 academic ...

In 2014, China launched an ambitious poverty alleviation program (Solar-energy Poverty Alleviation Program, SEPAP) by implementing solar photovoltaic systems in ...

A critical feature of China's poverty alleviation strategy is the prioritization of industrial poverty alleviation, particularly through the implementation of ten targeted programs, including photovoltaic (PV) poverty ...

Photovoltaic-based targeted poverty alleviation has been designated as one of "the ten large-scale poverty relief programs" in China. In spite of remarkable achievements, a number of ...

China implemented a solar photovoltaic (PV) poverty alleviation (PVPA) policy of building nearly 0.24 million PVPA power plants in 2014-2020 to fight poverty.

Since 2013, the Chinese government has identified targeted poverty alleviation as an important national development strategy.

By the end of 2019, in China, the task of PPAP construction had been fully completed, with 26.36 million kWh of (PV) photovoltaic power plants having been built and 4.15 million households benefitting. This ...

Since 2013, China has implemented a large-scale initiative to systematically deploy solar photovoltaic (PV) projects to alleviate poverty in rural areas.
