What is Solar Village project?

India, the world's most populous country and 3rd largest greenhouse gas emitter, faces severe energy poverty. Solar Village Project empowers communities with solar solutions, tackling climate change and creating a brighter future where it's needed most. Our installed solar systems have become the backbone for vital community services.

How much solar power does a village use?

With the village consumption merely one to two megawatts, the excess is added to the transmission grid. Government schools, bus stops and utility buildings in the village of Modhera in Gujarat, India, now run entirely on solar power. "There are three major components to this entire project.

What is Solar Village Social Services Project Foundation (svssf)?

Solar Village Social Services Project Foundation (SVSSF) SVSSF is our local Section 8 foundation in India, driving our mission on the ground. It manages projects, fosters community relationships, and ensures sustainable impact through tailored solar solutions. Our process begins by first connecting with the community and gathering information.

How do you build a community that is solar powered?

Build a community that is solar powered with closed loop use of resources as a model, and central test bed and research facility for the on-going development. Develop and build a system for sharing the ideas, concepts, systems, components, and models developed in an open source model.

You might be surprised to learn about a remarkable village that has embraced solar power as its sole energy source. This community has ...
