Truly "green" Electric Vehicles (EVs) require renewables for charging. Hence, we have developed a bidirectional smart charging station for EVs with integrated solar electricity generation, increased ...

The Solar City is a durable, future-proof AC charging station built for high-traffic environments. Developed and produced in the Netherlands, it's already powering the world's first bidirectional ...

Cities started to increase their collaboration in recent years, working together in regional concessions for public charging infrastructure. This approach has enabled new public charging infrastructure to be ...

Networks of smart and bi-directional charging cars, stationary batteries and other decentralised sources offer a fast-growing flexibility potential that can grow into an integrated, city-wide flexibility system.

We aim to advance sustainable mobility by offering innovative smart charging infrastructures. The Rotterdam charge centres are smart because the software will ensure that the available power is ...

Covering nearly 10,000 square meters, this two-storey structure is ...

Wallbox and PowerGo are collaborating to deploy EV charging solutions across hotels in the Netherlands. The project includes the installation of Wallbox's Em4 AC chargers and Supernova ...

We proudly present the first smart and sustainable sidewalk in the Dutch neighbourhood, Rotterdam Reyerood. The "solar energy sidewalk" delivers power to a multifunctional light pole, the CENT-R. ...

Fortunately, a groundbreaking solution is emerging in Rotterdam, where a network of over 15,000 charging stations operates as a Smart charging network is paving the way for a more resilient, low ...

Covering nearly 10,000 square meters, this two-storey structure is equipped with over 2,000 solar panels,

Solar mobile charging system in Rotterdam the Netherlands

making it a powerhouse of renewable energy. The solar panels generate electricity that ...

Mobile equipment will be combined with existing charging options across the city as much as possible, and standard solutions will be provided once there is clarity on the additional charging demand that ...
